

# Download database

You must have Microsoft Access version 2002 (XP) or later to use the database. Click the link below to download the database, a zipped Access file. Several web browsers can not open Access files directly.

[Download database](#)

Choose button **Open**.

Extract the database ASK3\_db.mdb with button **Extract** where you want it, e.g. on desktop.

When you open the Access-file it starts with a list of tables and questions.

When you mark an object in the list an explanation shows.

Doubleclick the object (table or question) to open it.
